

Qwant launches its browser extension on Safari!

- In response to user demand, [Qwant](#) launches a [browser extension](#) to be installed as the default search engine on Safari, Apple's browser.
- [Qwant](#) thus offers all Safari users a search solution that respects privacy and does not collect personal data.
- This [browser extension](#) will enable [Qwant](#) to accelerate the growth of its audience: 9.4% of French people use Safari on computers and 30.6% on mobile¹

Qwant is now available as an integrated part of Safari for all Apple users

Qwant, the French search engine, leader in Europe, which protects the privacy of its users by not collecting their personal data, is now available by default, for Safari users, thanks to a downloadable and installable [browser extension](#) on Mac, iPhone and iPad.

With the new [Qwant browser extension](#), users will now be able to access the [Qwant](#) search engine directly to perform their web queries on the Safari browser. The installation is very quick and allows Safari users to automatically access their favorite search engine.

This development will allow the company to offer its privacy-friendly search engine to new users. With Apple phones accounting for 22%² of the market, [Qwant](#) hopes to expand its service and grow its audience on Safari.

Qwant on mobile: the browser that protects your privacy

The Qwant mobile application is also still available for [Apple](#) and [Android](#) mobile users. It installs Qwant as a privacy-friendly browser with the Qwant search engine natively integrated. The Qwant browser on mobile also integrates Qwant VIPrivity, the feature that blocks most targeted ads, trackers and cookies while browsing the web, beyond the search engine. The application therefore ensures that browsing is free of profiling, and in complete confidentiality.

The Qwant browser extension for Safari is available on the Apple App Store: <https://apps.apple.com/fr/app/qwant-for-safari/id1645050159>.
